## Top five tips for successful online caregiver training

1. **Log in early** – Log on **15 minutes** before training to ensure your tech works smoothly.
2. **Stay focused** – Eliminate **distractions** like chores, phone use, or errands during training.
3. **Camera on, clear view** – Keep your **camera on** with all participants visible.
4. **Attendance** – **Missing 20 minutes or more** means you will need to leave the class and retake the course to receive your completion certificate.
5. **Plan for childcare** – Due to **sensitive content** and management of the learning environment, children **are not** permitted to be present during training.
